for the Internship Semester of Bachelor Studies in
INTERNATIONAL INFORMATION SYSTEMS

Internship Semester

Which semester: 5th semester
Duration: 20 weeks

Practical Training

Training Objectives:
- Being instructed to work independently and on one's own responsibility
- Being introduced to the professional field by working as independently and responsibly as possible on information systems projects
- Gaining specific knowledge in information systems, information technologies, data processing, and/or business administration
- Extension and acquiring in-depth knowledge about organizational problem solutions in the company

Training Content:

Students should work as independently as possible in the analysis, design, and implementation of business/IT processes.

In the context of information system projects, independent and responsible participation in various project phases (system analysis, system planning, conception, design, implementation, system introduction and consulting) should be made possible.
