

# SUMMERTIME

## Plants, Patterns & Excursions.

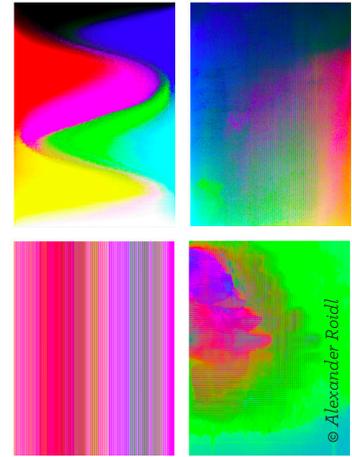

Exploring experimental design techniques with different media.

Flowers - Screenprint experiment

Blossoms of roses - Illustration

Digital illustrations & experiments

In this design studio, we explore the diversity of plants in unique Bavarian landscapes and nature reserves. Shapes, colours, blossoms, growth and locations serve as a source of inspiration for an artistic engagement of the theme **Plants & Patterns**.

You will learn a variety of design techniques using different media. From this *collection*, you will develop your own ideas for patterns and put them into practice.

An essential aspect of this design studio is your own observations and haptic experiences.

During several excursions, you will have the opportunity to experiment with materials and techniques. You will also integrate found objects from civilisation.

In artistic exercises, you will get to know the faculty's well-equipped workshops and try out different methods for **designing innovative patterns and structures**:

- Illustration and collaborative drawing
- Versatile screen printing techniques
- Experimental photography and light drawings
- Model building with simple manual techniques
- Linocut (optional)

**Think around the box:** All resulting patterns, drawings and design techniques are presented in a box designed by you - including a sophisticated cover.

**Excursions:** The excursions will take you to secret peaks of the Alps, a natural moorland area with rare and endemic plant species and the Botanical Garden in Munich with wonderful wild gardens and 12 greenhouses representing all climate zones on Earth.

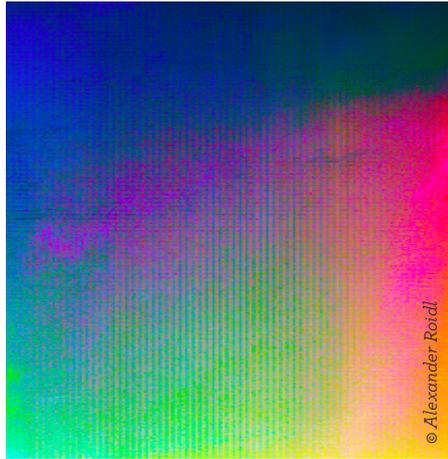

**International exchange:** In this design studio, you will have the opportunity to interact with international students, speak English and experience cultural diversity.
